We live in a constantly changing world and Cape Verde wants to follow the new times, programming is one of the main tools of the present and future of the work in an increasingly digital society.

To show the importance of programming, Cape Verde, in partnership with the multinational IBM and code.org organizes today a totally virtual initiative to celebrate International Code Day.

It will be at 19 pm and the event can be followed live via the page <https://www.facebook.com/caboverdigital>
