

JOSEPH OLUWATIMILEHIN AMBALI

Technology Professional | Cybersecurity & Digital Forensics Specialist | ICT Consultant | Digital Transformation Advocate

Joseph Oluwatimilehin (Timi) Ambali is an Information Technology professional, cybersecurity practitioner, digital forensics specialist, and technology consultant with over 15 years of professional experience spanning ICT infrastructure, systems administration, network integration, web and digital solutions, cybersecurity, and digital transformation.

He holds a qualification in Information Technology from the Irish University Business School, Ireland, and has built a diverse career working across technology consulting, ICT project design and deployment, infrastructure support, cybersecurity, and digital solutions.

Timi is a Certified Forensic Examiner (CFE) with the Computer Forensics Institute of Nigeria, Certified in Cybersecurity (CC) by ISC2, and a Certified Cybersecurity Education Professional (CCEP). His professional interests and expertise extend across cybersecurity, digital forensics, emerging technologies, artificial intelligence, technology education, and the strategic application of digital innovation to solve real-world business and societal challenges.

Over the course of his career, he has provided ICT consulting and technical services through engagements with organisations including ICANN Business Constituency (USA), and Dot-Engage Nigeria, contributing to technology projects from conceptualisation and solution design through deployment, implementation, support, and continuous improvement.

He also serves as a Board Member/Director of the Africa Information and Communication Technologies Alliance (AfICTA), a private-sector-led alliance connecting ICT associations, multinational corporations, technology companies, institutions, and professionals across more than 30 African countries. Through this role and other professional engagements, he has contributed to conversations around Africa's digital ecosystem, Internet governance, technology development, innovation, and the role of ICT in economic and social transformation.

His international exposure includes participation in the ICANN Africa Multi-Stakeholder Internet Governance Meeting in Addis Ababa, Ethiopia, representation of AfICTA at the ICANN Africa Strategy Meeting in Mauritius, and participation in the Innovation Africa Digital Summit in Victoria Falls, Zimbabwe. These experiences have strengthened his perspective on the intersection of technology, policy, innovation, business, and Africa's evolving digital future.

Timi is currently the Chief Operating Officer at Dotengee Nigeria Enterprise; a technology solutions company focused on domain registration, web hosting and cloud solutions, leveraging digital technologies to automate business processes, strengthen cybersecurity, and support organisations in their digital transformation journey.

A passionate advocate for the responsible adoption of emerging technologies, Joseph is

particularly interested in the transformative potential of Artificial Intelligence, cybersecurity, automation, and digital innovation. He is committed to helping individuals, businesses, institutions, and communities understand how technology can be strategically applied to improve efficiency, solve complex problems, create opportunities, and build a more secure and digitally inclusive future.

With a combination of hands-on technical experience, consulting exposure, cybersecurity expertise, international technology engagement, and leadership within Africa's ICT ecosystem, he brings a practical and insightful perspective to conversations on the future of technology and Artificial Intelligence.
